

**Environmental Audit: Science Challenge**

**Due June 2, 2014**

Name: \_\_\_\_\_.

**Key:**

- 1= unable to tell
- 2= a lot of waste
- 3= quite a lot of waste
- 4= a little waste
- 5= no waste

Fill out the chart below to find out how much waste you have at your house.

	1- unable to tell	2- a lot of waste	3- quite a lot of waste	4- a little waste	5- no waste
Dripping taps					
Recycling TAG					
Composting					
Recycling paper/do not print unless its needed					
Turning lights off when not in use					
Running air conditioning efficiently					
Turning off electronics rather than letting them "sleep"					
Walking or cycling to school					
Using efficient lightbulbs					
Battery use and disposal					
Grocery bags					

*Add up your total points and divide your total by 10 to get the average for your household. Add 2 points if you buy bottled water. Subtract 2 for each of any of the following: you use solar power (either a panel or clothes line), you use public transport frequently, you only use environmentally friendly bug spray or no spray, you reuse containers for lunch, you often have trash-free lunch, you buy larger packages of snacks rather than individual ones, you use environmentally friendly cleaners, you give away used toys and clothes...*

Overall, I think my household \_\_\_\_\_  
\_\_\_\_\_.

One area I would like to tackle is \_\_\_\_\_.

I can do this by \_\_\_\_\_.

**Draw a picture below that shows one way in which you think your household has reduced waste well.**
